

Doc # AP3-WLQues-072701

Apex III *Questionnaire*

Wireless Demo – TCP/IP Addressing Requirements

To facilitate the equipment setup and configuration, the following worksheet should be completed by the IS staff at the facility prior to the wireless demonstration.

1	Type of terminal emulation required (i.e. TN-5250, VT-220)	
2	Supply two unused IP Addresses (one for access point and each terminal type presented)	
3	ESSID (Extended Service Set Identifier) - default is 101	
4	Host IP Address	
5	Host Port Address	
6	LAN Subnet Mask	
7	IP Address for any Default	
9	Gateway on System? (this is needed if the Ethernet connection has a Router sitting between it and the Host).	
9	Supply the Domain Network Server IP Address (if used)	
10	Supply one available ethernet port near/convenient to the area where we will set-up equipment for "proof of concept".	

Set-Up and Configuration instructions for the 11 MB & 2 MB Access Points can be download from Compsee's web site.
