MAT Terminal
Citrix Setup

Citrix:

Access infrastructure for the on-demand enterprise
Gives workers secure, easy and instant access to enterprise applications and
information from anywhere, at anytime, using any device, over any connection.

- 160,000 organizations worldwide rely on Citrix Access Suite
- 4,900-plus companies worldwide use Citrix Online products

For more information – www.citrix.com

MAT and Citrix:

Like other terminal emulation applications, the request to communicate to a Citrix
infrastructure is customer driven.

If a customer is using a Citrix infrastructure, we have the solution with the MAT.

Not only is the Client Free, but it can be easily demonstrated!

Client Download:

Go to:	www.citrix.com	
Click on:	Download	(upper right of the page)
Click on:	Clients	(right side under Downloads)
Click on:	ARM4I	(Under WINCE/PocketPC)
Scroll to:	Version 8.33	("exe" file in English)
Click on:	Get Software	(pulls up a new screen)
Click on:	Download Here	
Enter:	Location where the file will be saved	

Once on your computer, use ActiveSync to load the file on your MAT and
execute it.

Customer Demo:

At the customer site, when you get in the vicinity of an Access Point, the MAT will
will automatically access the host log on screen, just like on any other Citrix client
enabled device or desk top terminal.
