| **Doc # AP3-WLQues-072701** | **Wireless Demo – TCP/IP Addressing Requirements** |

To facilitate the equipment setup and configuration, the following worksheet should completed by the IS staff at the facility prior to the wireless demonstration.

| | | |
|---|---|---|
| 1 | Type of terminal emulation required  (i.e. TN-5250, VT-220) | |
| 2 | Supply two unused IP Addresses<br>        (one for access point and each terminal type presented) | |
| | | |
| 3 | ESSID (Extended Service Set Identifier)  - default is 101 | |
| 4 | Host IP Address | |
| 5 | Host Port Address | |
| 6 | LAN Subnet Mask | |
| 7 | IP Address for any Default | |
| 9 | Gateway on System?<br>        (this is needed if the Ethernet connection<br>         has a Router sitting between it and the Host). | |
| 9 | Supply the Domain Network Server IP Address (if used) | |
| 10 | Supply one available ethernet port near/convenient to the area where we will set-up equipment for "proof of concept". | |
