You've got questions. We've got answers.

- "Why should I consider giving bar code data capture technology a try?"

When you put the power of Bar Code data Capture technology to work, you'll find that your costs are lower, accuracy is increased, and productivity is higher. This should come as no surprise. It's a lot faster capturing data at the speed of light than entering it manually with a pencil and paper.

- "Who can benefit most from bar code data capture technology?"

Just about any manufacturing, distribution, or warehouse operation can benefit by putting a bar code data capture system to work. It doesn't matter whether your needs are modest or your company is small. Bar code data capture technology is perfect for businesses of all kinds.

- "What kinds of problems can bar code data capture technology solve?"

When information is at your fingertips, you always know the complete status of your operation. This means that when you tell a customer that you can fill their order, you won't have to worry about whether the quantity of the product you promised is really sitting on your shelf. When you put barcoding to work, your employees won't misplace or lose products — which means customer satisfaction will be a lot higher.

- "Is bar code data capture technology difficult to use?"

One of the great things about bar code data capture is that it's extremely easy to use. In fact, it can be as simple as plugging a scanner into a computer. If you want to discover how incredibly easy it is to put the power of barcoding to work, give Compsee a call. We'd be happy to show you how quickly you can unlock the power of this exciting technology!

- "How much will bar code data capture really cost? I'm very concerned about the bottom line."

Barcoding probably costs a LOT less than you think. But the best way to get an accurate answer to this important question is to arrange for a free Cost Analysis from a Compsee representative. They'll be able to measure the cost of the technology in proportion to the manpower-hours you'll save. You'll be amazed by how little it costs to reduce employee manual entry errors and increase efficiency.

- "Why should I consider using a new technology when I'm doing just fine with my manual system?"

All it takes is a little experience with barcoding to show you how incredibly more effective bar code data capture technology really is. But don't take our word for it. Give Compsee a call and let us prove what manufacturing, distribution, and warehouse executives all across the country have already discovered. That bar code data capture can quickly do wonders for your bottom line.

- "What should I look for in a bar code data capture vendor? Who can help me make the right decisions?"

There are many companies out there that claim to be "experts" in bar code data capture technology. That's why it's so important for you to choose a vendor carefully. When you work with Compsee you know you can count on getting an integrated solutions — not a hodge-podge of piecemeal products.

Who says the bar code revolution is just for the "big boys"?

It simply isn't true. You don't have to be a giant corporation to take advantage of the latest bar code data capture technology.

In fact, if you're running a small manufacturing, distribution warehouse operation, bar code technology could be the perfect way to slash costs and dramatically increase productivity.

That's right. Even if your business is extremely modest in size, Compsee, a leader in bar code-based data transaction systems can help you run things a lot more cost-effectively than ever before. You see, Compsee specializes in providing growing businesses like yours with a wide range of proven, time-tested hardware and software solutions.
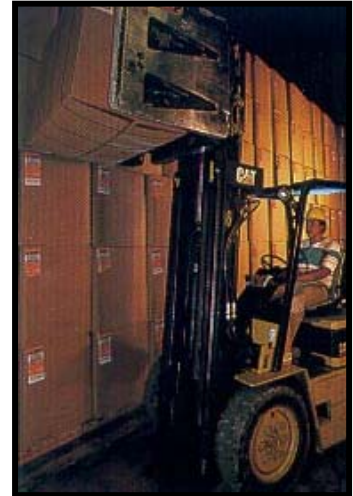

Why is a bar code data capture system so valuable to companies like yours?

Because it helps avoid the inevitable human error inherent in a manual system, and provides real-time information that you can put to use immediately. For example, we can help with put-away, picking, shipping/receiving, warehousing, asset tracking, quality control, and much more.

No wonder companies that have already put the power of bar code data capture technology to work have discovered an important fact. That what you actually do with data — how it is collected, processed, and acted on — can slash manufacturing, distribution, and warehouse management costs, increase productivity, and dramatically boost profits.

If you're looking for a way to improve your bottom line and meet the tough competitive challenges you face, take a close look at what bar code data capture can do for your organization. You'll discover that it can put you where you really need to be.

In total control of information.
