Barcom, Inc. was established in Chattanooga, Tennessee, in 1991; its focus is on systems integration of data collection and computer automation technology.

Barcom's primary focus is the interface of data collection applications into existing computer environments; its employees have a thorough understanding of hardware, networks, RF, labeling, bar code symbologies, and application flows. But the firm's most valuable asset is its vast experience in working with major applications that ultimately interface to data collection systems.

As a Systems Integrator, we provide a wide range of services and support, including: Hardware, Software (Packages and Custom), Interface Services, Supplies, Training, Documentation, Design, and Consulting.

Barcom has also developed numerous software solutions for specific industries, including: Vehicle Sequencing & Shipping, Automotive Part Rack Tracking, Distribution Picking Verification, Fulfillment Picking / Shipping, Label Application / Verification, Work Order Tracking, Pick To Light, Label Control, Weigh Room Control, MAPICS Data Collection, and PRMS Data Collection. We also have many customized applications developed specifically to customer specifications as well as many other ERP systems with which we've interfaced.

Target Markets:

- Manufacturing / Distribution in Southeast US.
- Emphasis on Automotive Suppliers

Success Installations Include:

- High Speed Pick and Pack - Retail Distribution Center
- High Speed Sortation - Distribution Center
- Automotive Parts Sequencing
