DHS is a leader in software development and is dedicated to giving you the best service in the industry. DHS has developed the most advanced 32 bit Windows® Records Management Software, Self Storage Software and Asset Tracking Software available in the world.

Our clients include many large companies and organizations, including Fortune 1000 companies, financial institutions, governmental agencies and all types of other business enterprises.

DHS Worldwide has over 300 success installations located all over the world.

DHS Worldwide offers three versions of Total Recall™ Records Management Software. Our *Corporate*

Program is designed specifically for corporate clients. Our *Standard Commercial Records Management Program* is designed to manage all aspects of a commercial records management business. Our *MS SQL Records Management Program* is designed as an enterprise solution for multi-site commercial records centers. Each of our Record Management products have extensive capabilities for managing vault media. All versions are state of the art, 32-bit programs that are fully bar code enabled. They are designed to work with any version of Microsoft Windows® 95 or higher.

DHS Worldwide offers two versions of its Total Recall™ Asset Tracking software. Our *Standard Asset Tracking*

Program is designed to be used to conduct periodic asset inventories. Our *MS SQL Asset Tracking-Management Program* is designed to serve as a comprehensive asset tracking and management program. Both versions are fully bar code enabled and are designed to work with any version of Microsoft Windows® 95 or later.
