Since 1989 ECR Software Corporation has realized its vision to provide the retail industry with top quality point-of-sale automation, inventory control, customer tracking, and sales reporting solutions. ECRS products are delivered to customers by direct installation teams and by a dealer network extending throughout and beyond the US and Canada.

With over 10,000 installed locations, ECRS has proudly achieved high levels of customer satisfaction with such notable companies as Family Dollar, Silcorp, Yankee Stadium, Ben & Jerry's, Philip Morris, Nestle, Gibson Guitars, and many other retailers of all sizes.

Catapult™ realizes the vision of ECR Software Corporation to provide small and midsize retailers a complete enterprise automation solution. From the beginning, the goal of ECRS has been to create a tool that will give its users a decisive, competitive edge over their competitors. Catapult achieves this goal by combining the power of Microsoft® Windows NT/2000/XP with a feature-rich retail application.

Catapult is the first point-of-sale (POS) solution written specifically for Windows® NT/2000/XP that offers retailers truly exceptional features and functionality. It is the result of exhaustive industry research and feedback, as well as superior design and development based on years of experience.

Whether you are buying, receiving, selling, or transferring merchandise, tracking customer purchases, or reviewing your purchase history with suppliers, you are assured accurate and immediate information.

With Catapult there is little training involved, no complicated manuals to wade through, no cryptic keystrokes to memorize, and all the benefits that you would expect from a state-of-the-art **Windows® NT/2000/XP** solution. The system can be tailored to work within almost any retail environment.
