Misys Healthcare Systems is a leading provider of healthcare information systems for the entire continuum of patient care. Misys Healthcare Systems designs, develops, and supports a comprehensive suite of information products for hospitals, independent laboratories, physician practices and long-term care providers that serve the healthcare IT industry's broadening spectrum of needs. In addition to 85,000 physicians, 1,250 hospitals and 850 home care providers, the company's large, well-established customer base includes hundreds of laboratories, clinics, managed services organizations and other related organizations.

Misys Healthcare Systems' desire to create products and services that leverage clients' current investments, reduce costs and bring real value to their practices means the company provides instrumental, cost-effective tools that enable healthcare practices to focus on patients, not IT systems.

Physician Systems provides software solutions for:

- Practice management
